

WELD RODS

DESIGNED FOR USE WITH HOMOGENEOUS AND HETEROGENEOUS FLOORING

AHF Contract® weld rods are recommended for use in surgical suites, intensive care units, labs, and other aseptic spaces where sterile conditions and superior infection control are a priority. Weld rods can be combined with flash coving to provide superior seam strength and tightness, preventing dirt and moisture from getting under the floor in spaces where it matters. Weld rods are available in coordinating colors to seamlessly blend in or can be used to enhance a design aesthetic to add a hint of color.
